Co-Operative Creameries Show Tremendous Increase in Butter Production.

The Dairy Commissioner, at first an nual convention of Saskatchewas Dairymen's association, reviewed progress of 1915 which shows a great in crease in the butter production of the co-operative creameries amounting to 1,500,000 lbs. He also said the improvement in quality is shown by the preference accorded Saskatchewan butter in outside markets. Shipments out of the province for the year totaled 52 carloads. According to bulletin just issued by

the Manitoba department of agriculture, the dairy industry had a very successful year in 1915. There was an increase of over 1,000,000 lbs. of creamery butter produced, as against the previous year, about 260,000 lbs. increase in dairy butter and over 25,000 lbs, increase in the cheese output. The increase of the total value of milk and milk products was over \$427,000. The production of dairy butter for Manitoba during the year was 4,150,444 lbs. and it brought an average price of 23c per lb.; of creamery butter 5,839,667 lbs, were produced which commanded 29c per lb. on the average; cheese production was 726,725 lbs. which sold at an average price of 15c-the total value of these three products is given as \$2,760,608, in addition to which the milk produced is valued at \$025,659 and the cream at \$158,827, the average price of the milk being reckoned at 2.1c per lb. and of sweet cream at 32c per lb. butter-fat. In connection with the dairy industry it is interesting to note that almost the most important fodder crop now is corn, of which the 1915 production amounted to 190,132 tons. The biggest cultivated fodder crop is timothy which for last season produced 193,357 tons and the next nost popular crop was brome grass with 45,815 tons; of alfalfa and clover there were produced some 38,000 tons. The number of cattle in the province is given as 631,005, which is an in-

You will also receive a booklet of valuable information, telling about the kidneys and bladder. When writing, be sure and mention this paper. Regular fifty-cent and one-dollar size bottles for sale at all drug stores.—Adv.

"Dark Lightning." The expression "dark lightning"

seems to be paradoxical. As a matter of fact dark lightning is a product of the laboratory. In the development of camera plates that have been exposed to lightning flashes some of the strenk images are reversed. This is thought to be due to overexposure. Prints made from the negatives show the streaks as dark lines, hence the expression "dark lightning." The path of a lightning flash is frequently shifted by wind. The action of the wind appears to broaden the line of lightning until it resembles a ribbon. The uniform broadening along the entire length of a lightning flash has probably never been observed.

RED, ROUGH, SORE HANDS

May Be Soothed and Healed by Use of Cuticura. Trial Free.

Nothing so soothing and healing for red, rough and irritated hands as Cuticura Soap and Cuticura Ointment. Soak hands on retiring in hot Cuticura soapsuds. Dry, and gently anoint bands with Cuticura Ointment. A one-night treatment works wonders.

Concrete Highway Trestle in the Sao-

ramento Valley is of Record

Length.

One of the most absorbing exam-

ples of concrete construction so far

executed in America is represented by

a causeway that spans the Yolo by-

pass in the Sacramento valley. The

Popular Mechanics Magazine de-

scribes the construction of this trestle.

It is thought to be the longest of its

kind in the world and has lately been

completed under the supervision of

the California state highway commis-

sion. Although 3.00 miles from end

to end, and a striking specimen of

good, accurate workmanship, the ele-

vated roadway was built in a thor-

oughly substantial manner for less

than \$385,000. Certain phases of the

construction were accomplished by

original methods which have attracted

The unit system was followed in

erecting the trestle which is 20 feet in

height and provides a roadway 21 feet

wide. It is supported on re-enforced

the attention of engineers.

Don't Poison Baby.

ORTY YEARS AGO almost every mother thought her child must have PAREGORIC or laudanum to make it sleep. These drugs will produce sleep, and a FEW DROPS TOO MANY will produce the BLEEP FROM WHICH THERE IS NO WAKING. Many are the children who have been killed or whom health has been ruined for life by paregoric, laudanum and morphine, each of which is a narcotic product of opium. Druggasts are prohibited from selling either of the narcotics named to children at all, or to anybody without labelling them "poison." The definition of "narcotic" is: "A medicine which relieves pain and produces sleep, but which in poisonous doses produces stupor, coma, convulsions and death." The taste and smell of medicines containing opium are disguised, and sold under the names of "Drops," "Cordials," "Soothing Syrups," etc. You should not permit any medicine to be given to your children without you or your physician know of what it is composed. CASTORIA DOES NOT CONTAIN NARCOTICS, if it bears the signature of Chas. H. Fletcher. of Chas. H. Fletcher.
Gennine Casteria always bears the signature of Cast Hitches

Odd Places to Hide Cash.

The woman who, as just revealed in the law courts, hid her savings on her mother's grave in Forest Hill cemetery, probably hit upon a unique cache. But there is no saying. The person who mistrusts savings banks generally looks around for the most unlikely spot in which to deposit wealth, and more than one may hit on the same idea. Old cannon, for instance, seem to form favorable depositories. Quite a quantity of jewelry was found some while ago in a solitary gun which stands in a fort at Shoreham, and about the same time a bag containing 70 sovereigns was discovered in an old cannon in Peel park, Bradford. From one of the old Crimean cannon at Liverpool, also, some inquisitive youngsters once brought forth a soldier's discharge papers and notes to the value of £100.—London Chronicle.
